

Mathematical Java Workshops

As part of an NSF-funded project (DUE-9950714), a workshop will be conducted on the campus of Emporia State University in Emporia, Kansas, during the summer of 2000 with a second workshop and conference in the summer of 2001. Twenty participants will be selected to attend.

Workshop Goals

Participants will be trained in the use of the Java programming language to create activities that can be deployed on the Internet for the teaching of mathematics. They will then create their own activities that will be posted on a web site and presented at a conference to be held at the end of the second workshop in 2001.

Participant Benefits

- Training in the use of Java as an aid in the teaching of mathematics.
- Software, textbooks, and tutorials. Over \$300 worth of materials will be supplied to each participant.
- Housing and meals on the ESU campus during the workshops and conference.
- Stipends for each workshop. (\$350 for 2000 and \$250 for 2001 for each participant.)

Participant Obligations

- Transportation to and from the workshops.
- A commitment to attend both workshops and to use the training provided to create and test activities during the 2000-2001 academic year.

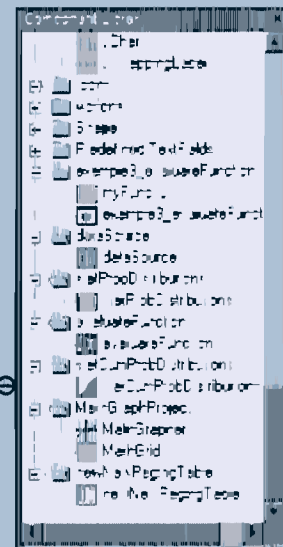

Participant Selection Criteria

Twenty participants will be selected. The primary criterion for selection will be evidence of experience with innovations in mathematics teaching, particularly as it relates to the use of technology. No previous programming experience will be necessary. Mathematics faculty from universities, four-year colleges, community colleges, and high schools are eligible.

Dates

First Workshop:
June 18-24, 2000
Second workshop and conference:
June 17-23, 2001
Application Deadline:
March 31, 2000
Notification of acceptance:
April 14, 2000

Applications

Applications may be submitted electronically or via mail.

Applications as well as additional workshop details are available at <http://mathcsjava.emporia.edu> or contact:
